Data Analytics — Turning Complex Data into Actionable Business Insights

Professional Profile

Detail-oriented Data Analyst with a strong foundation in data mining, statistical analysis, and business intelligence. Proficient in using Python, SQL, and advanced visualization tools to clean, analyze, and interpret data, creating clear dashboards and reports that drive strategic decision-making. Combines technical expertise from a Data Science degree with a practical focus on solving real-world business problems.

Education

Bachelor's of Science in Data Science

GIFT University

2021–2025

Intermediate in Pre-Engineering

Punjab Group of Colleges

2020

Matriculation

M.S. Memorial High School

2018

Technical Skills

- **Data Analysis & Programming:** Python, Numpy, Pandas, SQL, R.
- **Data Visualization & BI:** Power BI, Tableau, Matplotlib, Seaborn, Microsoft Excel.
- **Databases & Big Data:** MySQL, NoSQL, SQLite, PostgreSQL, Hadoop (HDFS), PySpark.
- **Data Mining & Warehousing:** EDA, Statistical Analysis, Data Processing, ETL Processing.
- **Data Processing & Analytics:** Data Cleaning, Data Validation, Data Processing, Data Analysis.

Projects

Financial Market Analytics

Tools: Python, PowerBI, Excel

Analyzed global economic indicators to predict market trends (Up/Down/Stable) and built interactive dashboards with a web app for real-time insights.

E-Commerce Analytics

Tools: Python, Machine Learning, Power BI

Analyzed e-commerce sales data to understand customer behavior and built a model to predict order status (Shipped, Cancelled, Unshipped).

Healthcare Analytics

Tools: Python, PowerBI, Flask

Analyzed hospital patient data to predict stay duration and classify readmission risk (Low/Medium/High), and deployed a Flask web app with real-time predictions and Power BI dashboards for insights.

Salient Object Detection (FYP)

Models: SELFMASK, BASNet

Tools: Python, Flask, OpenCV

Proposed a hybrid deep learning architecture by combining SELFMASK and BASNet for accurate salient object detection, improving segmentation quality in complex backgrounds.

Professional Experience

- Developed end-to-end data analytics projects using Python, SQL, Power BI, Tableau and ML to solve real-world business problems.
 - Built interactive dashboards, predictive models, and analytical reports by applying data cleaning, EDA, ETL, and visualization techniques.
-

Achievements

- Achieved Gold Honour, ICSC (International Computer Science Competition) 2025 – Ranked in the top 1% among all participants for outstanding performance and problem-solving skills.
-

Certifications

- | | |
|--|------|
| • Data Analytics Essentials – Udemy | 2026 |
| • Data Mining with R – Mind Luster | 2026 |
| • Data Visualization with Python – Cognitive Class | 2026 |
| • SQL and Relational Databases – IBM / Cognitive Class | 2026 |
-

Additional Information

- **Soft Skills:** Analytical Thinking, Problem Solving, Data Storytelling, Time Management, Communication
 - **Languages:** English (Fluent), Urdu (Native), Punjabi (Basic)
-
